Jinkyoung Park

(971) 255-2980 | parkjin@oregonstate.edu | github.com/JKP43 | Portfolio Website

Summary

Graduate Computer Science student with hands-on experience in software development, Python, C/C++, automation, AI/ML systems, cloud technologies, and enterprise data validation. Experienced in building automated software workflows, debugging and validating data across systems, deploying applications on AWS, and collaborating across technical teams.

Education

Oregon State University **2025 –2027**
Master of Engineering, Computer Science
GPA: 3.6 / 4.0

Oregon State University **2021 –2024**
Bachelor of Science, Computer Science | *Minor: Mathematics*
Graduated Cum Laude | GPA: 3.6 / 4.0

Technical Skills

Programming Languages: Python, JavaScript, C, C++, Kotlin
Data & Databases: SQL, MySQL, MongoDB
AI / ML: YOLOv5, MLflow, PyTorch
Cloud & Platforms: AWS, Linux, Windows
Tools: Git, Jira, Android Studio, Visual Studio
Software Engineering: REST APIs, OOP, debugging, testing, CI/CD pipeline, shell scripting

Projects

Autonomous AI for Recycling

- Engineered an end-to-end Python workflow to automate real-time data collection, YOLOv5 model training, and deployment of updated recycling detectors.
- Integrated MLflow and MongoDB for experiment tracking and model version management, supporting iterative development and reproducibility.
- Deployed models on AWS to support scalable storage and remote inference while collaborating with cross-functional teams using GitHub for version control, collaborative development, and testing.

Mood Tunes

- Built a Kotlin Android music discovery app that recommends songs based on user-selected mood using the Jamendo API, Retrofit, and Moshi.
- Implemented components of an MVVM-style architecture using ViewModel, Repository pattern, Kotlin Coroutines, and caching logic for asynchronous data loading.
- Created RecyclerView interfaces and improved usability and visual consistency by refining screen layouts, navigation flow, and user-facing interactions throughout the app.

Experience

VPR Project Assistant (Student Technical Assistant) – Oregon State University **2026 – Present**

- Executed enterprise data migrations across institutional systems and developed validation methods to identify discrepancies, improve accuracy, and streamline migration workflows.
- Developed Python scripts integrating Excel workbooks and institutional APIs to automate user-data retrieval and streamline enterprise data migration workflows.
- Documented migration procedures and communicated technical status, discrepancies, and resolution details to coworkers and stakeholders.
